

COMPREHENSIVE WEBSITE CONTENT SOLUTIONS FOR THE ENTERPRISE

OptiCMS™ is a flexible content management system (CMS) for organization requiring enterprise-class functionality, integration and scalability when managing their ever changing websites content.

Business Facts

A big problem with today's internet world is the fact that most websites have old and obsolete content being displayed to the public.

The disastrous effect of this is it creates a poor reflection of your business and of the products you have to offer, it can actually do more harm than good.

If you have invested time and money into a website but it is now projecting unattractive, unprofessional, obsolete or irrelevant content, your website will lead to negative ROI for your business.

Our Solutions - OptiCMS™

We know that your website is the face of your company and corporate brand. The right content management software can take a significant role in maintaining the coherence of your site. Application of style-sheets and reuse of graphical elements guarantees presentation is consistent with your corporate visual identity. Accessibility standards can be applied directly, so legal compliance is ensured.

Our Satisfied Customers

Many of the companies using our software are international corporations with strong multi-features requirements.
